SG-2000
自然與科技的美麗共生

改變全球生活型態的新風潮
A global and leading trend of lifestyle

SHIANJI

SG-2000

CE TÜV IEC JIA CE SIST

The advertisement features a woman relaxing in a white bathtub filled with bubbles. The background is a blue sky with clouds and a large, stylized blue water droplet. The product name "SG-2000" is prominently displayed in a large, bold font. Below it, the Chinese text "自然與科技的美麗共生" (Natural and Technology's Beautiful Coexistence) is written. The English text "A global and leading trend of lifestyle" is also present. The advertisement includes various certification logos at the bottom, such as CE, TÜV, IEC, JIA, and SIST. The brand name "SHIANJI" is visible on the bathtub's control panel.

Who are we?

We are in the wellness and lifestyle business, representing a 20 years old home spa products and equipment manufacturing and R&D company to promote its products. With just 1 main star product - **SG2000**, our business operations have penetrated into 7 countries - Singapore, Malaysia, Thailand, Hong Kong, Taiwan, China and Canada in just over the last 5 years.

Our partnership with the world's most established Kneipp Hydrotherapy Institute in Germany for research and development is a hallmark of our credibility and reputation as a leader in hydrotherapy research.

SG2000 - used in Kneipp Institute by practitioners for healing therapy

Picture from above

- SG2000 Used at the Seb-Kneipp Schule of Hydrotherapy for teaching and research (Sebastian-Kneipp Schule of Hydrotherapy is the world's leading established institute of Hydrotherapy practice and research)
- SG2000 used for therapeutic cancer treatments and chronic illness in hospitals and naturopathy institutions, private general practices in Taiwan, China, Thailand, Malaysia, Singapore & Australia

What is Hydrotherapy?

Hydrotherapy is the use of water to maintain health, soothe pains or treat injuries and diseases that is probably the oldest form of medical treatment used by many cultures, including those from ancient Egypt, Rome, China and Japan. Egyptian royalty bathed with **herbs** and flowers while Romans had communal baths for their citizens.

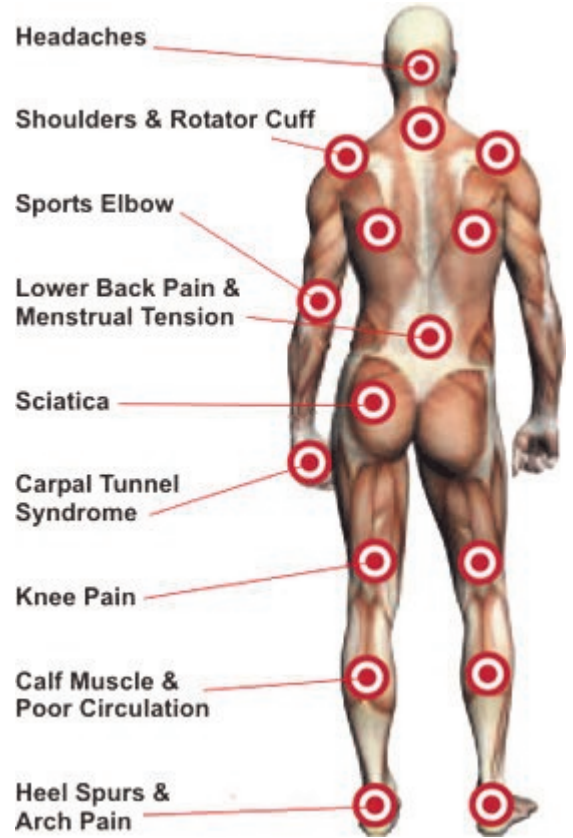

Water would 'dissolve, remove and strengthen'. Dissolve matter-containing disease in the body, remove diseased matter from the body and strengthen the body by restoring cleansed blood in the tissues and maximizing **blood circulation**.

Why are we here?

Besides solving the problems relating to poor air and water quality. Positioned for the home market, SG2000 effectively targets:

- 1) Busy people with no time to exercise.
- 2) Stressed out executives with no time to de-stress.
- 3) Persons suffering from chronic illness like back ache, rheumatism, arthritis, gout, high blood pressure, diabetes, depression, stroke, cancer, asthma, migraine etc. Click [HERE](#) for more

Life Murderer

人生殺手

Depression

憂鬱症

- Anxiety, pressure, non-stop busy
- Depression has quietly become one of the top 10 causes of death

High position CEO, white collar working class can't escape to be the 1/10 depression victims

- WTO prediction: Depression will become the 2nd killer

Source: Tien Xia Magazine

Today's Health Reality

The world's leading causes of premature deaths are degenerative diseases:

- * Cardiovascular disease (17 million)
- * Cancer (8.6 million)
- * Stroke (5.5 million)
- * Respiratory disease (3.7 million)
- * Diabetes (990,000)

How to avoid getting cancer at young age?

New Understanding Of Cancer

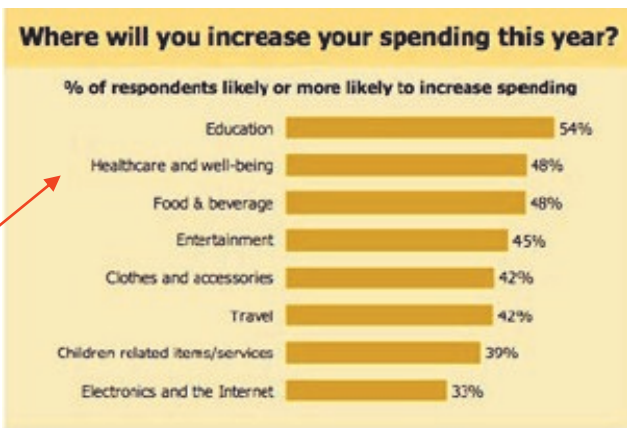

1 out of every 4 persons in their entire life time may have cancer, for the past 10 years, the number of cancer patients between 30 and 59 increased by 81%, However 40% of the cancers can be prevented

Source: Tien Xia

The following article statistics depict this growing phenomenon in wellness spending on SPA.

48% will be spent on wellness & healthcare

Boom time for the spas

With more people seeking facial and slimming treatment, the industry is poised to grow.

More patients are using hydrotherapy to treat conditions ranging from stress to back pains. **Joan Chew reports**

When Chang General Hospital (CGH) was built 15 years ago, it came with a small pool which was one-third the size of an Olympic swimming pool.

There, the warm water, heated to 33 deg C, helped to soothe the aches and pains of patients with orthopaedic and spinal conditions. It also helped others with neurological conditions, such as Parkinson's disease, to better control their movements.

Seeing how these patients benefited, CGH, over the years, gradually expanded water-based physiotherapy to include more patients suffering from other conditions.

About a decade ago, those with stress-related ailments started to pick up relaxation techniques using water.

And then in 2008, those battling the bulge or who had sports injuries were welcomed to have a dip in the pool.

Ms Elaine Gomez, the manager at CGH's rehabilitative services, said the buoyancy of water makes people feel weightless.

For this reason, it is a more forgiving medium for patients to exercise in.

At the same time, water provides resistance during exercise, which is good for strength training.

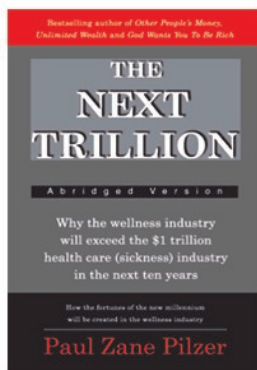

Close to 1,500 CGH patients used hydrotherapy last year, representing a 42 per cent increase from five years ago.

In another sign that hydrotherapy is gaining traction in the medical community, KK Women's and Children's Hospital (KKH), the only other hospital here with a hydro-pool, also reported an increase in the number of patients using the therapy.

KKH currently treats about 50 to 60 such patients a week, which is a 20 to 25 per cent increase from the figure two years ago.

Health & Wellness The Next Trillion Dollar Industry

According to Economist and Best Selling Author Paul Zane Pilzer,

"By the year 2010, an additional \$1 Trillion of the [US] economy will be devoted to products and services that keep us healthy, make us look or feel better, slow down the effects of aging, and prevent diseases from developing altogether."

The Market opportunity

- 1) Large market
- 2) Low investment cost
- 3) Zero risk
- 4) Quick Profit
- 5) Rich Rewards

How do we solve the problem?

Introducing SG2000

Using technology, we are now able to bring the benefits of hydrotherapy right into the comfort and privacy of the home. We also has a complete combination of spa oil and salts to complement the entire spa experience.

The Power of SG2000 Home SPA

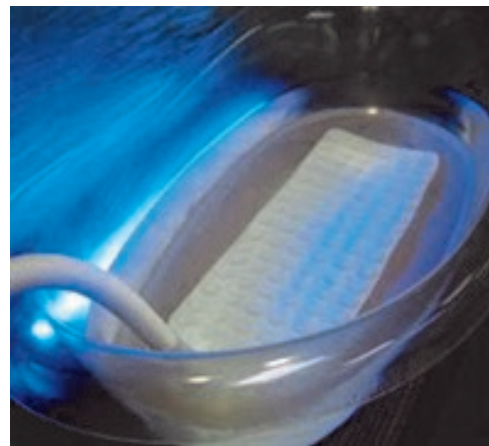

Therapeutic Ultrasound - Hydrotherapy Spa's natural ultrasound increases blood flow and warms our bones internally to improve our immune system. It also gently massages our body through 10000-15000 micro tremor/sec dilutions of the cells, revitalizing our body!

Ozone/negative anion- That fresh smell after rain. Ozone replenishes Oxygen and releases negative ions to neutralize radiation in our body. Disinfects effectively and gives body a natural whitening effect.

Far Infra Red Ray (FIR) - The most important ray of sunlight. FIR Improves metabolism and blood circulation. Changes the structure of the water to become softer for our skin to absorb. British encyclopedia certifies its anti aging, anti cancer & anti stroke properties .

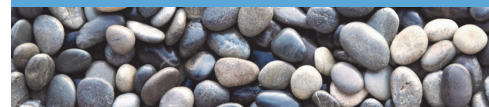

What Do You Get Out Of Hydrotherapy and How It Can Help You!

If you are suffering from any of the following symptoms Arthritis, Rheumatism, Sciatica, Aching Joints, Back Pain, Fatigue, Insomnia, Circulation, Stress, Muscular pain, Stiffness, Cramps or Tension, Eczema, or you just want to maintain your health, see how Hydrotherapy can target these problems very effectively.

Taking Hydrotherapy bubble Home SPA regularly shall help you to achieve the following goals:

- Improve Blood Circulation
- Improve Metabolism
- Strengthen Immune System
- Improve Body Resistance
- Activate Body Resistance
- Avoid Urban Illness
- Feeling & looking 10 years younger!
- Energizing and Beautifying your body

1) Pain Relief

The ultrasound produced in Hydrotherapy SPA releases your muscular tension and help to reduce joints giving you increased mobility and more importantly lessens your pain. Fine bubbles are also released, and this has a soothing tranquil effect on your body which helps relieve your stress and tension.

2) Internal Warming & Circulation

Much like throwing an egg into the Japanese hot springs where the egg yolk would cook first instead of the egg white. Ultrasound helps warm the densest mass of our body (ie the bones), bringing heat from inside out, and circulating blood flow. Good blood flow is important for bringing oxygen and nourishment to all your cells and tissues. When working correctly, this forms the basis of a healthy life. Good circulation also brings the benefit of good lymph drainage which helps the liver and kidney to clear of toxins.

3) Boost your Immune System - Prevention of Urban Conical Diseases

As ultrasound warms the bones, it stimulates the production of our natural killer red & white blood cells, which are what constitutes our immune system. Detoxing regularly, leads to a stronger immune system which is able to cope with controlling viruses, bacteria and infections. Your immune system is like your internal police force and when working efficiently, helps you overcome minor infections ranging from the common cold right up to deadly diseases.

4) De-stress through a total body massage

Relaxing with SG2000 daily can provide you with the vital key to breaking the stress cycle of everyday modern life. High blood pressure, headaches, digestive complaints, insomnia, depression, anxiety attacks are examples of stress related illness. Unfortunately stress not only affects the mind but more importantly your immune system. Fortunately, the ozone in SG2000 helps the brain release serotonin, which is an important natural antidepressant of the body. Ultrasound massage also translates into 1.5kg pressure capable of simultaneously massaging all 320 acupuncture points in the body, much more effective than a massage therapist or massage chair.

5) Effects of Exercise

Just 15 minutes of bathing with SG2000 has a heat exchange of 1158 k/cal or equivalent to a 3km run, or just like after a strenuous workout. SG2000 reflects your health condition, if you have been exercising regularly. This key benefit is the main reason why SG2000 has been termed the solution to a busy man's exercise!

6) Deep Cleansing & Improved Complexion

As our skin is the body's biggest organ, it aids breathing and controls metabolism. hydrotherapy helps to regulate your body's temperature control by improving the efficiency of your perspiration glands. This releases the toxins from your body and leaves you with a healthy glowing complexion. The gentle ultrasound produces 15000 micro tremors per sec, thoroughly cleans the body, clearing pores and promote metabolism. You literally feel lighter after your first trial!

7) Body Contouring

15 minutes of Hydrotherapy SPA treatment burns approximately 300-400 calories, firming up tissues and skin. The oxygen flow increased by the effect of the millions of bubbles can also help reduce fluid retention and even have a dramatic effect on other ailments such as cellulite. Finally, an effortless way to having a slimmer body, targeted at the areas where you like it slim, giving you greater confidence!

8) Disinfections

Healing SPA penetrates into the skin and creates a deep cleanse through the pores. This will prevent infection from harmful bacterial, improve allergic conditions, whiten skin and control the spread of skin diseases. It also induces oxygen to the skin. Skin allergies like eczema etc would benefit greatly from the de-chlorine water and would not suffer from any more irritation from chlorine, fluoride in the water.

9) Reduce Fatigue

This therapy relieves muscle tension, alleviates mental stress, elevates mood, restores vitality and reduces fatigue after a hard day's work.

10) Strengthens Hormonal Function

This form of hydrotherapy promotes the normal secretion of hormones, strengthens the function of reproductive organs, and can improve the quality of family life. There are numerous testimonies revealed that menstruation has reoccurred for older ladies, and men have regained their capability of creating family life.

SG2000 specifications

- * High-tech, low-noise processing unit and trouble-free assembly
- * High output: 46 liters of air laden with ozone and anions.
- * SG2000: L 38cm x W 28cm x H 24cm (WT : 6kg)
- * Flexible mat with ceramic cells: easy to clean and fits all bath tubs.
- * Mat: L 86.5 cm X W 29cm
- * Modern design: sleek and durable.
- * Equipped with timer and intensity control.
- * Safety guaranteed: insured worldwide; compliance with CSA and CE requirements.
- * Easy installation: DIY possible; light and portable.
- * ITACS CERTIFIED meets Australian standards.
- * Economical: 1/4 the price of an imported Jacuzzi
- * One years warranty and lifetime servicing
- * Energy saving: 110V/220V selection.
(suitable for USA and Europe/Asia/Australian markets)

MOYA's luxurious 100% Essential Aromatherapy Oils will refresh and enlighten your senses whilst experiencing Hydrotherapy SPA at its best.

Lavender -relaxes and eases body tension, has calming effect and excellent for insomnia.

Renowned international bodies including US, Canada, Europe, China, Singapore and Thailand have certified our products safety requirements. In Thailand, the Thai royal family also enjoys our SG2000 home spa and has crowned our equipment to be of medical grade standards, used in the physiotherapy departments in hospitals.

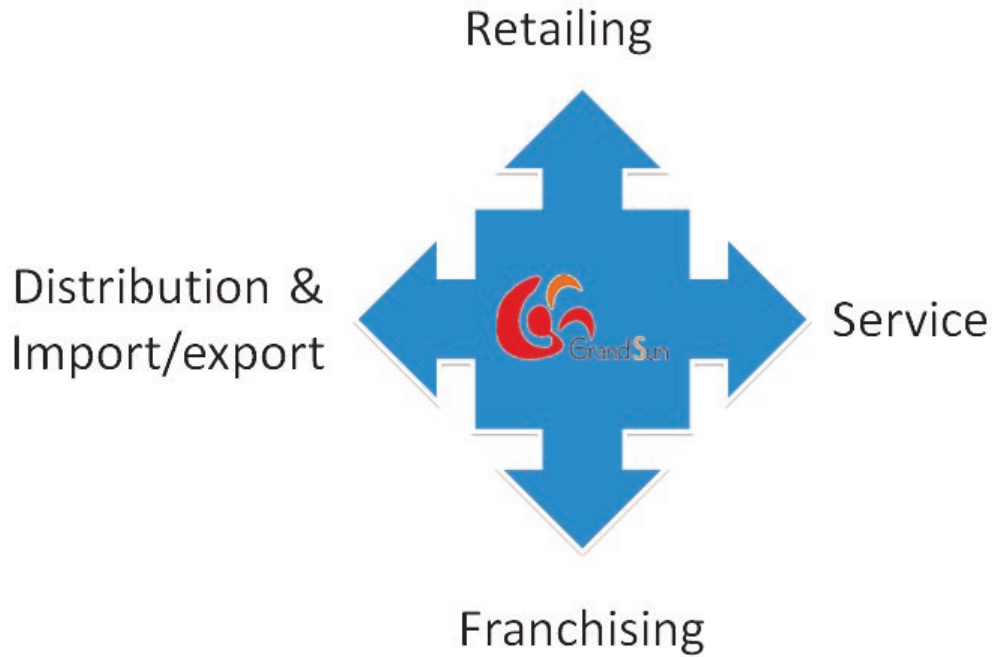

The business model

Multi diversified income sources to explorer.

Revenue model

Helping new and existing business to increase revenue by up to 30%.

	Before implementation	After incorporation of Spa
	Eg: Complement Existing Hair/ Beauty / Spa Centre	
Business Traffic	Dependant on Peak Period / Space Availability – services are long	Additional product line / high usage turnover rate → high health effectiveness / free up space
	Eg: Condominium Projects	
Cashflow	As per development project gain → one time off in nature / Expensive Jacuzzi maintenance	Increased Cashflow → Oil Residual Income from residents using spa → large compounding multiplier effect
	Eg: Increase Perception of Hotel's Value Added Services	
Revenue	Hotel Room Rates/ F&B	Service Fee Charged for usage + Sale of machine from visitors

Aroma Oil residual income projection

Assumption 10,000 users through 10,000 homes sold in the development projects

Vol. of oil used daily = 5cc x 10,000 = 50,000 cc

No. of bottle = 250 bottles (200cc)

Dollar value of consumption = 250 bottles x S\$100 = S\$25,000

Assuming conservative calculation of min 4% (global payout bonus)
= S\$25,000 x 4% = S\$1,000 per family

Daily income if 2 persons spa or 2 twice a day
=S\$2,000 per day or **S\$60,000 per month**

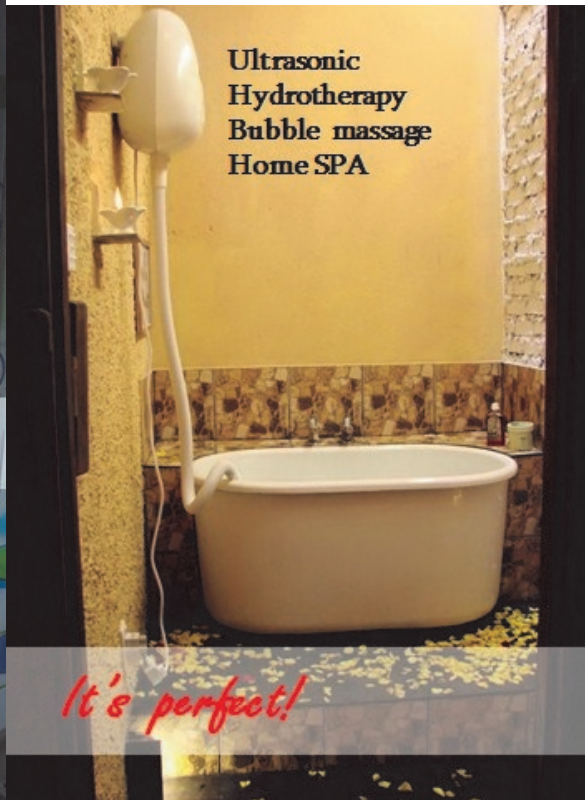

In SPA therapy centers/Beauty & sliming centers

Massage bath for pets

In homes/Condo development units

Type of portable tubs, ABS material

L 38"/43"/46"
W 27.5"
H 23"

- *Excellent for home with space constraints.
- *Portable
- *Affordable S\$500-S\$600

Our principles

Our business works on the basis of helping our partners. We look for the right people in their local country who would like to partner with our team to grow a million dollar wellness industry in Asia and the other region with minimal investment. Our business model is so successful and has proven to grow exponentially in other countries. In fact, the countries mentioned were all started by people like you and me who had the vision to succeed. We can configure to your requirements to match your business needs.

Start a Home SPA business in your own home!

The demo and experience center, you may call it, allows more friends and customers to visit and experience the hydrotherapy home SPA. Its also can be used as a center by other distributors for networking. You can benefit from the health and wellness industry to explore this unique business opportunity.

With the SG2000 Home Demo center/experience center, you use your networking contacts to develop a strong customer base. Then, from that customer base, develop a distributor network, which in turn, expands your business through their networking contacts. This may be the best choice in getting your career going with Grandsun!

The invitation

We invite potential business partners to meet up for a discussion to explore the business opportunity that is riding on a world trend. There are many synergies in our products to complements your products too. Do feel free to contact us, or enquire more. Thank you.
